## Motivation

At my studies i worked consistently with the theme of „Memory“ - to design time. Sustainability not in terms of sustainable production of fabrics or other materials but sustainable design. The transcendental (the fashion) and the permanent (the values of life) to concentrate in one concept. To find an identity for the garment, „to make clothes, which are like friends“.

In particular i like to deal with themes and occasions, which are almost lost in our time and society. Inspiration for my collection „Clownscape“ was the world of circus; the marks and traces , which the circus leaves behind; apparitional spirit of past pleasure.
